Section 5

TO

The title to each section are too small. Need to increase font size

First Section

CURRENT

In 1770, a machine stunned the world by beating grandmasters at chess.

Napoleon played it. Benjamin Franklin studied it. No one could explain how a machine could think so brilliantly. The secret? **A grandmaster analysing, weighing, deciding and manoeuvring the chess board.**

250 years later, the same truth holds. AI tools are everywhere — but without a senior technologist inside your org, they're just theater.

‘Senior Technologist
with AI Skills - FraCTO’

Second Section

CURRENT

THE ENTERPRISE AI CHALLENGE

Most enterprises have the ambition for AI — but the partners advising them have competing incentives. Independent guidance changes the equation.

- 01 Misaligned incentives**
Traditional partners advise on transformations that affect their own revenue. Independence removes that tension.
- 02 Strategy-execution gap**
Great strategies need embedded follow-through. Plans without execution ownership stall.
- 03 Organizational complexity**
AI transformation cuts across teams, budgets, and reporting lines. Someone needs to own the horizontal.

TO

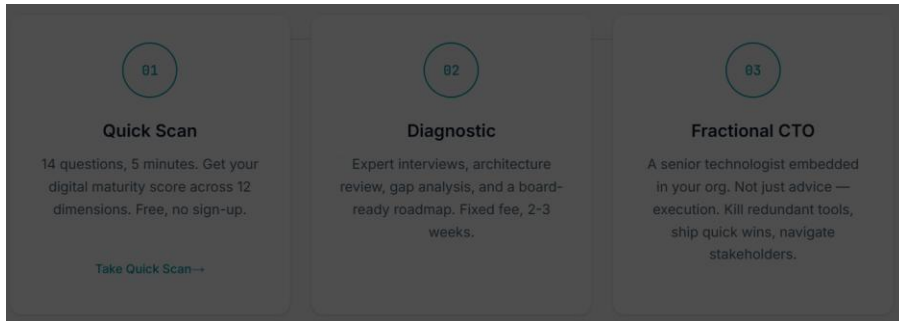

Need to bring in the E2E view. Tie to our 18/12 Matrix

Make language positive. We want partners to put in a good word

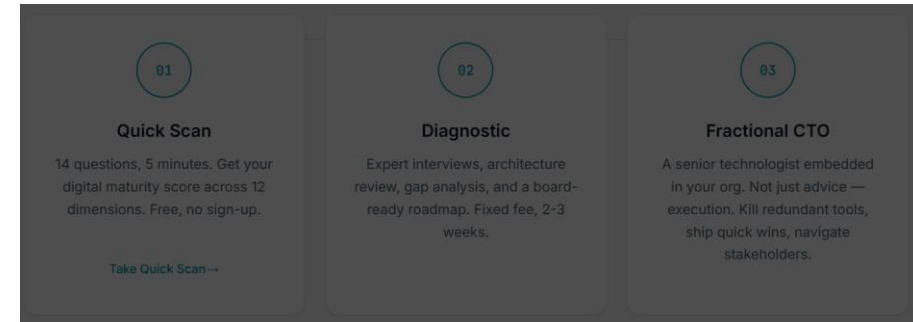

Needs to be consistent with our slide deck. Use existing from what we have used for LSEG

Third Section

CURRENT

TO

Add one more block between quick scan and Diagnostic to match to the 3 phases we have mentioned in LSEG deck. So it should be quick scan plus the 3 mentioned in LSEG. Match timelines

Fourth Section

CURRENT

TO

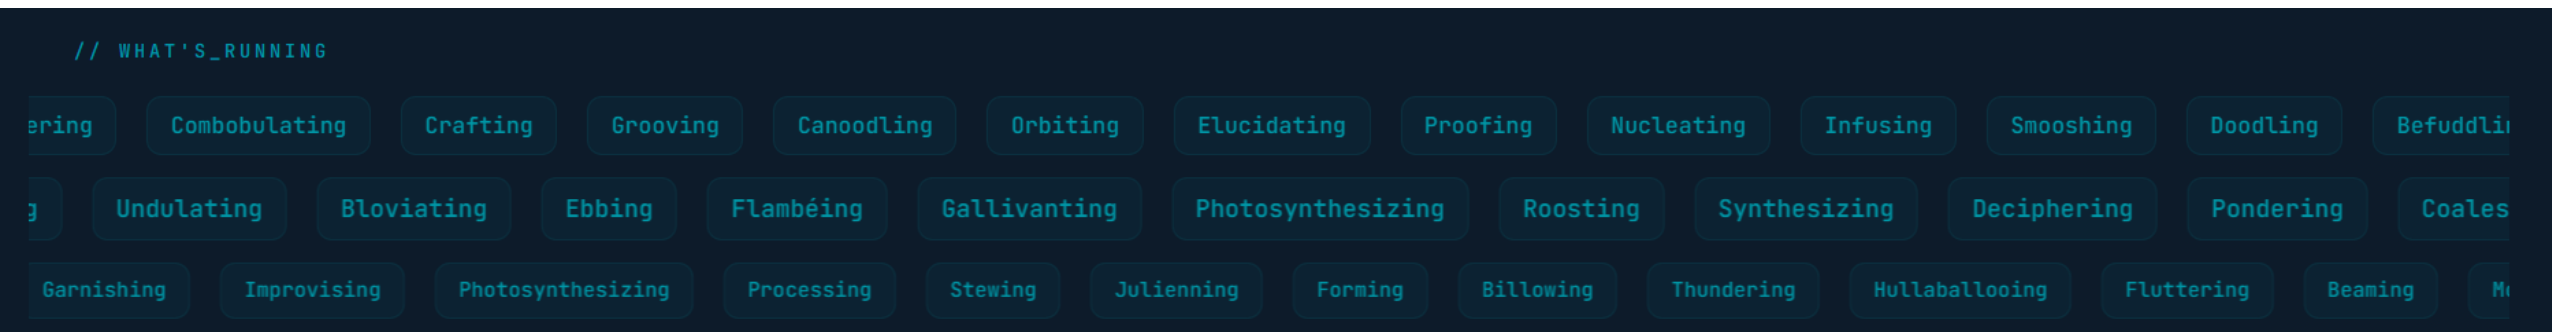

S	S	A
Senior IT Leader MBA, SP Jain Inst of Mgmt.	Serial Entrepreneur MBA, INSEAD	AI-Native Technologist MBA, IIM & B.E. IIT Delhi
Decades of experience leading IT transformations at scale. Has managed the exact vendor ecosystems, partner dynamics, and organizational politics that FraCTO helps clients navigate. Knows what good looks like — and what realistic looks like.	Track record of building and scaling businesses. Brings commercial acumen, market positioning, and the ability to turn a capability into a business. Ensures FraCTO doesn't just advise — it delivers.	Functional and technical knowledge with AI-first thinking. Builds the assessment platform, designs the AI skills, and ensures every recommendation is technically sound and implementable.

Need to somehow link Senior IT leader to Fractional CTO, then bring in AI Native Technologist and show how the Serial entrepreneur brings in experience of scaling a start up
